

ES important questions

1. Explain in detail about structure of an ecosystem with suitable examples.
2. Write about nitrogen cycle and water cycle with a neat sketch.
3. Explain in brief about characteristics and function of forest ecosystem.
4. Explain in detail about cyclic flow of nutrients between biotic and abiotic components with the help of neat cycle
5. Write about hydrological cycle and phosphorous cycle.
6. Write the classification of ecosystem.
7. Describe the effects due to deforestation.
8. Explain about India as a mega-diversity nation.
9. What is mineral exploration. Write about problems due to mineral exploration with a case study.
10. Explain in detail about biomagnification.
11. Describe the effects due to deforestation.
12. Describe the main factors of land degradation.
13. Write a brief note on food chain and food web.
14. Explain about citizens role conservation of natural resources.
15. Explain about renewable and non-renewable energy resources.
16. Explain in detail about ecosystem of biodiversity.
17. How do Biogeochemical cycles play an important role in an ecosystem, write about Phosphorus cycle.
18. Write detailed note of ecosystem services and values
19. Discuss about environmental effects while extracting and using of mineral resources.
20. Discuss in detail about Value of biodiversity
21. Explain about the energy flow in an ecosystem.
22. Explain in detail about the ecological pyramids.
23. Describe the citizens role in conservation of natural resources.
24. Explain about the effects of timber extraction.
